

2023 PROGRAM REPORT

Maryland PIRG

ACTION IN THE PUBLIC INTEREST

YOUR SUPPORT MADE IT POSSIBLE

DEAR MEMBER

As a consumer advocate, Maryland PIRG can help people save a dollar or avoid a scam. But people have come to expect so much more from PIRG's unique brand of consumer action.

After all, in today's economy, the best deal may be the one that measures value in terms of quality, not quantity. Healthcare that prioritizes wellness, for example, over the most costly treatments. Energy policies that plan for the long term survival of our planet, while protecting the near term interests of ratepayers. Or products that last, and can be repaired, repurposed and recycled, sparing us (and the planet) the costs of waste.

In this report, you'll find PIRG staff and members taking action and winning results to reduce wasteful plastic packaging, expand the right to repair, increase energy efficiency, and more.

We're grateful that so many people like you support PIRG's advocacy and action. Thank you.

Emily Scarr
State Director

MEMBER SPOTLIGHT

“PIRG keeps me informed. A variety of topics are covered from individual changes I can make to larger government issues that I can at least sign letters of concern. I greatly appreciate PIRG for fighting for a safer, healthier world.”

ACTION IN THE PUBLIC INTEREST

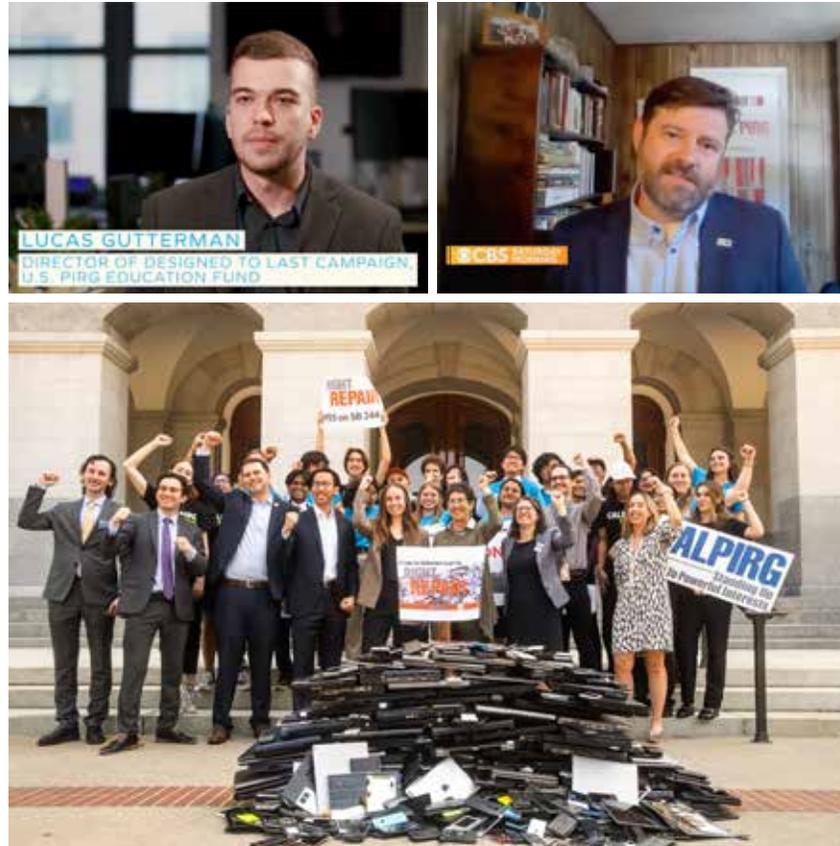

RIGHT TO REPAIR

Victory: Google agreed to extend the life of Chromebooks

Things aren't made to last anymore, resulting in more waste and more cost to consumers. In 2023, PIRG's Right to Repair program helped secure a commitment from Google to keep working electronics out of the waste stream.

Three years after the pandemic pushed schools to provide students with Google Chromebooks, many schools were struggling to replace laptops that had "expired." Our federation of state PIRGs and a coalition of nonprofits, parents and teachers called on Google to extend the lifespan of these devices, and in September, Google announced it would extend the automatic update "expiration date" to 10 years for all Chromebook models released since 2021.

Waste reduced: Amazon is phasing out padded plastic bags

It can be frustrating trying to reduce plastic in your own life when it's all but impossible to avoid. It's even more frustrating when you put it in the blue bin, but it doesn't get recycled as promised.

After a group of PIRG volunteers investigated and found that the plastic Amazon shipping packaging they tried to recycle was instead sent to the landfill, PIRG supporters like you and our national coalition delivered more than 138,000 petition signatures to the company urging it to eliminate plastic in U.S. shipments. And in July, Amazon responded, announcing it would phase out padded plastic shipping bags in favor of recyclable alternatives.

ACTION IN THE PUBLIC INTEREST

CONSUMER PROTECTION

Efficient energy: We fought to strengthen EmPOWER

Since 2008, Maryland's energy efficiency program has saved ratepayers more than \$4 billion on energy bills and reduced Maryland's greenhouse gas emissions by the equivalent of 9.6 million metric tons of carbon dioxide.

As good as that is, we knew Maryland could do even better. Maryland PIRG Foundation's original research and analysis found that the EmPOWER program could bring ratepayers more energy savings and go further to support the state's climate goals. Building on findings from our report, we launched a campaign to pass legislation that would strengthen consumer protections and ensure the program supports the state's efforts to reduce fossil fuel pollution.

BAN TOXIC PFAS

Kong Lor

In February, REI Co-op announced it would require its suppliers to eliminate all per- and polyfluoroalkyl substances, or PFAS, from outdoor gear sold by the retail chain by 2026. The win came after thousands of PIRG supporters like you signed a petition to the outdoor retailer, urging it to make its products PFAS-free.

HIGH VALUE HEALTH CARE

Ways and Means Committee Republicans via YouTube

In February, PIRG filed comments with the U.S. Patent and Trademark Office, urging it to improve its process to allow generic drugs to reach pharmacy shelves. And in March, PIRG's Patricia Kelmar testified before a House committee to advocate for reining in the high cost of prescription drugs.

DEMOCRACY FOR THE PEOPLE

Staff

Maryland PIRG has advocated for and helped numerous counties adopt small donor public financing programs across the state. A December 2023 report found that such programs are working as intended in local elections, encouraging more people to contribute to candidates and reducing the role of large donors.

PIRG **W** CONSUMER WATCHDOG

Staff

In 2023, Maryland PIRG helped Baltimore residents challenge Baltimore Gas and Electric's proposed \$602.4 million multi-year rate increase. We organized residents like you to submit more than 600 comments opposing the unnecessary investment in fossil fuels and gratuitous rate hike.

CLEAN AIR MARYLAND

CLEANER, QUIETER LAWN CARE

Roman023_photography via Shutterstock

In October, PIRG released a report warning that gasoline-powered lawn equipment is dirtier than you might expect—for example, using a commercial gas-powered leaf blower for one hour emits as much smog-forming pollution as 15 cars. Our advocates shined a spotlight on cleaner, quieter electric alternatives.

STOP THE OVERUSE OF ANTIBIOTICS

Metroid Video

In December, PIRG celebrated a win when a federal court ruled that an antibiotic important to human health couldn't be used as a citrus tree pesticide. The overuse of antibiotics is fueling the rise of drug-resistant bacteria, and PIRG is continuing to advocate for the responsible use of these life-saving drugs.

50 YEARS OF ACTION & RESULTS

Maryland PIRG is part of a federation of independent, state-based, citizen funded Public Interest Research Groups. Together, we have a long legacy of victories in the public interest—including state and local wins that have provided blueprints for action nationwide.

1971: First PIRGs founded

Students start the first college campus chapters of Minnesota PIRG, Missouri PIRG and Oregon Student PIRG. PIRGs form in 20 more states over the next decade, and U.S. PIRG is founded in 1983.

1982: MASSPIRG saves the Bottle Bill

After winning a 9-year campaign to pass the Bottle Bill, MASSPIRG faced a new challenge: an industry attempt to repeal it. More than 8,000 citizen volunteers got to work, ultimately helping to defeat the repeal with a convincing 59% of the vote.

1984: PIRG hits student voter registration milestone

PIRG's newly launched National Student Campaign for Voter Registration registers 750,000 student voters in its first year, increasing the registration of 18- to 24-year-old voters by 17%.

1986: PIRG wins drinking water protections

PIRG plays a key role in passing strong new federal Safe Drinking Water Act amendments to better protect groundwater sources of drinking water and increase the pace at which contaminants are regulated.

1989: 'Trouble in Toyland' report sparks action

PIRG's first annual "Trouble in Toyland" report is released, warning parents of the hidden dangers of certain toys on the market. U.S. PIRG Education Fund has since published 36 other reports, resulting in more than 150 recalls.

1989: MASSPIRG wins law to reduce toxics

MASSPIRG authors and wins the passage of the Toxics Use Reduction Act, requiring industries to publicly disclose their use of toxic chemicals for the first time and plan for future reductions.

Five decades ago, groups of college students began investigating problems from shady business practices to illegal pollution. They called themselves PIRG—Public Interest Research Groups. Maryland PIRG and the PIRG network are celebrating 50 years of action for a change.

1998: PIRG wins reduction of pesticides in schools

CALPIRG, MASSPIRG and Maryland PIRG help win a series of laws to reduce the use of pesticides linked to cancer and other serious health problems in public schools throughout the 1990s and early 2000s.

2010: PIRG helps create CFPB

PIRG co-founds a coalition that, alongside U.S. Sen. Elizabeth Warren, wins the creation of the federal Consumer Financial Protection Bureau (CFPB). Since opening its doors in 2011, the CFPB has helped return \$16 billion in relief for consumers.

2012: PIRG helps win national clean car standards

Following years of advocacy by the state PIRGs, the Obama administration implements new national clean car standards calling for the average mile-per-gallon standard across the U.S. fleet of cars to hit 54.5 by 2025.

2014: California bans single-use plastic bags

After building support in cities and counties, CALPIRG helps pass the nation's first statewide ban on single-use plastic bags in California. Ten more states follow suit over the next decade.

2015: Tyson Foods announces antibiotics phase-out

PIRG helps convince the nation's largest poultry producer, Tyson Foods, to commit to no longer using medically important antibiotics in their chicken, paving the way for other corporations to follow suit.

2018: PIRG helps win free credit freezes for consumers

In the wake of several high profile data breaches, including at credit bureau Equifax, PIRG helps pass a federal bill ensuring access to free credit freezes for all consumers to help prevent damage from identify theft.
